

Senior Health Screen Questionnaire

Check the boxes that are true and bring this form with you to your senior pet's veterinary visit

My Senior Pet:

- is drinking more water and/or urinating more
- is having increased urinary and/or fecal accidents in the house
- has been having repeated episodes of vomiting in the last few weeks
- has been having repeated episodes of diarrhea in the last few weeks
- has been eating a lot more or a lot less in the last few weeks
- has been gaining or losing weight
- has been panting more
- cannot exercise for as long and seems to get very winded after playing hard
- has some new lumps or other skin abnormality
- has been whining more lately or acts anxious for no reason
- sometimes seems disoriented, stares into space or acts like he/she doesn't know me
- has been more sensitive to loud sounds
- has been more irritable with people and animals in our household
- has bad breath and/or has been drooling more
- has not been grooming his or herself (cats)
- has difficulty getting up and avoids going up stairs
- seems stiff at first but then warms out of it
